

STEM Jobs in Movies

HAVE FUN!

By Carla Mooney

DISCUSS

Talk through your thoughts.

- Talk about what STEM means and what part(s) you like.
- Discuss what you have watched that uses computer animation or motion capture.

CREATE

Make an experience of your own.

- With adult permission, create a short video about your summer. What new skills will you use in making it?
- With others, create a storyboard for a movie idea. Think about characters, settings, and action.

IMAGINE

Use your imagination to explore.

- Imagine you are a motion capture technician, follow the directions on page 17 to learn more about motion capture.
- On page 44 and 45, read the STEM job fact sheets. What job interests you the most? Why?
